DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kenneth Springer on July 8th, 2004.

Replace claim 1 with:

1. A method of performing a chemical vapor deposition processing comprising:

cleaning a process chamber at a first chamber pressure by producing a cleaning gas into the process chamber through a cleaning gas supply line;

pre-coating a film on inner sidewall of the process chamber at a chamber pressure lower than the first chamber pressure by introducing a deposition gas into the process chamber, wherein during said pre-coating, a backflow preventing gas is introduced into the process chamber through the cleaning gas supply line to prevent the deposition gas from flowing back toward the cleaning gas supply line;

loading a wafer into the process chamber after said the cleaning; and

depositing a film on the wafer at a chamber pressure lower than the first chamber pressure by introducing a deposition gas into the process chamber, wherein during said depositing, a backflow preventing gas is introduced into the process chamber through the cleaning gas supply line to prevent the deposition gas from flowing back toward the cleaning gas supply line.

Claim 24 is cancelled.

Allowable Subject Matter

2. Claims 1, 3-9, 21-23 are allowed.
3. The following is an examiner's statement of reasons for allowance:
4. While Taketa et al shows the use of a backflow prevention device using gas, neither this reference taken alone or in combination with the prior art of record disclose a backflow prevention system using backflow preventing gas introduced through the cleaning gas supply line to prevent the deposition gas from flowing back toward the cleaning gas supply line. It is this backflow prevention system as stated in the applicants arguments, in combination with the remaining elements and features of the invention, that the applicant's invention defines over the prior art of record.
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael D Masinick whose telephone number is (703) 305-7738. The examiner can normally be reached on Mon-Fri, 7:30-4:00.

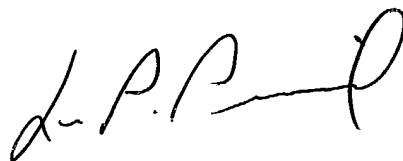

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leo Picard can be reached on (703) 308-0538. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
